

Dear Sirs

**TO WHOM IT MAY CONCERN – PROPOSED TURKEY BREEDER UNIT AT PEN Y
FFRIDD, SARON, DENBIGH LL16 4SW**

Gamber Logistics Ltd is contracted to purchase and/or remove poultry litter produced on sites operated by contract growers, egg producers, poultry processors, and breeders throughout Wales, the West and the Midlands. We handle around 75,000 tonnes of litter per annum across > 75 sites and distribute it to more than 200 customers. We are willing to purchase/remove poultry manure from the site above and sell it to existing and/or prospective customers across our trading area. Currently the most likely outlet is to one (or more) of our anaerobic digester customers in the West Midlands or Staffordshire.

The litter can also sold to farms as a replacement for artificial fertilisers. The litter is sold by FACTS qualified salesmen, who are able to give advice, when required, on all compliance issues associated with organic manures, including but not limited to COGAP for Soil, Water and Air, NVZ regulations, the Farming Rules for Water, cross compliance and nutrient management planning.

Our customers are required to sign a statement acknowledging their responsibilities relating to the relevant legislation when transporting, storing and spreading litter. Duty of Care notes are produced for litter sent to AD plants.

Gamber Logistics keep electronic records of all sales, including customers names and addresses, dates of collection/delivery, and tonnages. These records are forwarded to site operators on a regular basis.

For further information, please see www.gamber.co.uk

Yours sincerely
