Total Exported Manure N (kg N/year): 0.00
Manure N Loading (kg N/year): 99,000.00
Is Compliant: **Yes**

Compliance Statement:

For land in an NVZ, you must ensure that, in any year from the 1st January, the total amount of Nitrogen in Livestock manure that is applied to your farm, whether directly by grazed animals or by spreading, does not exceed 170kg multiplied by the area of the farm (in ha). Or if a derogation has been granted it does not exceed that limit.

This report confirms that the 170kg, or derogated maximum, farm limit has been adhered to.
